**Young Environmentalists**

Hello Parents and Teachers,

**What's the mission of Young Environmentalists?**

Young Environmentalists is where you'll find news, ideas and activities concerning a wide range of environmental topics for young readers, aged 10 years through mid-teens. From global warming and renewable energies to conservation and habitat protection, *Young Environmentalists* seeks to present topics in a way that is accessible and relevant to this age group.

**Our mission is simple.**

We know that tackling the world's environmental challenges will require imaginative solutions—the kind of solutions that *Young Environmentalists* like to uncover. So, our aim is to provide the tools and resources that will help you help our future leaders. Understanding the environmental challenges facing the world today and tomorrow is what *Young Environmentalists* is all about.

We hope that we inspire you to explore the issues with your *Young Environmentalists*. We hope, too, that you'll encourage them to share their ideas and unique perspectives with us. Their voices and insights can inspire others! We can't wait to hear what they have to say!

Our message to children is simple: *Young Environmentalists* is the place for you if you want to know more about the environment and how you, your friends and family can help protect the planet!

We welcome your feedback, ideas and suggestions! Please send your comments to [stacy@emagazine.com](mailto:stacy@emagazine.com).

**Take Action!**

\*Keep organic foods organic  
 Politicians and big businesses want to gut organic food laws. Help us stop them. **Take action!**

\*Something is fishy  
 Mercury is a toxic contaminant that is showing up in dangerously high concentrations in the fish we eat, yet the FDA isn't protecting us!? **Take action!**
